**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, are drawn to a method of friction stir welding classified in class 228, subclass 112.1.
  - II. Claims 6- 9 are drawn to apparatus for friction stir welding, classified in class 228 subclass 2.1.
2. The two inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e). In this case the apparatus as claimed can be used to practice another and materially different process. For example, the apparatus of the invention II can be used for riveting. Furthermore the method can be practiced on an apparatus that lacks a pedestal member.
3. A telephone call was made to Attorney Anthony A. Laurentano on 6/24/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1725

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
